**The Prism Society** is a distinguished group of patrons who believe in the power of science to transform the ordinary into the extraordinary. From opening night exhibition celebrations to intimate conversations with contemporary scientists, researchers, inventors, naturalists, and educators, The Prism Society is designed to engage Discovery Place's most loyal patrons in the wonders of science, technology, and nature.

**The Helix Society** is a new opportunity for families to participate in unique STEM learning experiences with Discovery Place educators. Members are invited to family workshops, local field trips and private animal encounters throughout the year. The Helix Society is also designed to engage adults in STEM learning activities from our annual Science + Society lecture to the ever-popular Science on the Rocks.
